

- Evening Master Class -

Planning to Reduce Health Care Disparities

3 hour Evening Master Class* includes dinner

This evening workshop will address this topic in an interactive format and will answer such questions as:

- How should a "Maori Health Plan" be developed?
- What are important indices to consider?
- Are independent measures of performance really necessary?
- What sort of metrics are appropriate?
- How should data from these evaluation tools be analysed and the results incorporated into daily activities?
- What steps are required to demonstrate compliance with the Health Practitioners Competence Assurance Act (HPCA) and other regulatory authorities or obligations?

At the completion of the evening workshop, participants will have a sample template as well as guidelines to adapt the information to the unique needs of their own organisations.

**You must register for a symposium
if you wish to attend a Master Class*
